

Using a search engine :

To search on the internet, I use a **search engine**

There are various search engines
For instance :

- Google www.google.fr
- Yahoo www.bing.fr

How do they work ?

For example : I am looking for the post office opening hours

I open a **search engine**
I click on my computer's browser
such as Safari, Edge...

A search engine **is displayed**

I write the **key words** into the search bar
For instance, 'Lille Post Office opening hours'

When I write the key words
The search engine helps me by suggesting words

Gmail Images

quels sont les horaires de la poste

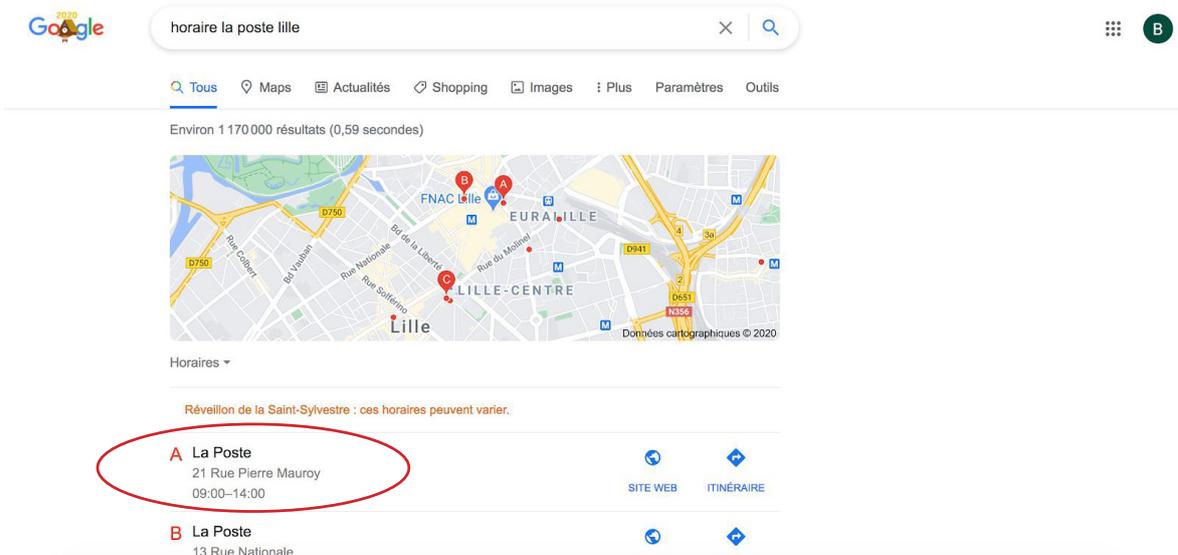

- quels sont les horaires de la poste
- quels sont les horaires de **livraison** de la poste
- quels sont les horaires **d'ouverture** de la poste
- quels sont les horaires de **livraison colissimo**
- quelles** sont les **heures pour poster sur instagram**

Recherche Google J'ai de la chance

Signaler des prédictions inappropriées
En savoir plus

When I click on **the magnifying glass or the key Enter** on my keyboard
A page opens with the names and addresses of post offices in Lille

To view the opening hours, I click on the one that is most useful

To get to know internet words,
I can use [the form 'Internet words and expressions'](#)
